We are looking for talented and enthusiastic international students to join our research team in the Person Perception Program at the CCD.

The Research

• We aim to understand the mechanisms (perceptual, cognitive, neural and evolutionary) of person perception and how they relate to other cognitive abilities and social functioning.
• As well as investigating person perception in typical adults, we also study how these skills emerge during typical development and whether these skills are impaired in children and adults with disorders of person perception (e.g., autism, developmental prosopagnosia).
• Methods include behavioural, eye-tracking, SCR, EEG and potentially tDCS.

The People

Prof. Gill Rhodes  A/Prof. Romina Palermo  Dr Linda Jeffery

The Place

• Join us in the Facelab and the PEPLab, located at the School of Psychology at The University of Western Australia, Perth, AUSTRALIA.

Scholarships

Scholarships covering living allowance and tuition fees are available for international students.

• Applications open 6 January, 2015, close 6 March, 2015, commencement 1 July, 2015
